<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 26112
<b>Description</b>		
<p>There's a subdivide algorithm in QGIS that split polygons based on number of vertices.</p> <p>It could be helpful to have more (common?) options based on area, width, equal parts, percentage (For information, some of the proposed options are picked from the <a href="#">SplitPolygon plugin</a>)</p>
