

QGIS Application - Bug report #18234

Esri Personal GeoDatabase (*.mdb file)

2018-02-26 08:31 PM - Almerio Moreira

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	3.0.0	Regression?: Yes
Operating System:	Windows 7 Professional	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 26125
Description I can not load a Esri personal Geodatabase file into Qgis 3 anymore. I has already added the following lines to qgis.bat: set OGR_SKIP=ODBC set PGEO_DRIVER_TEMPLATE=DRIVER=Microsoft Access Driver (*.mdb, *.accdb);DBQ=%s I also have QGIS 2.18.17 (LTR) installed on same machine and It still working there. I installed both from OSGeo

History

#1 - 2018-05-10 09:03 PM - Andrea Giudiceandrea

It seems that QGIS 3 is now launched directly, not through qgis.bat as was for QGIS 2.18.
Now you need to set the two variables in QGIS Settings panel -> Options | System | Environment.

The names and the values of the variables are:

variable name: OGR_SKIP
value: ODBC

variable name: PGEO_DRIVER_TEMPLATE

value: DRIVER=Microsoft Access Driver (*.mdb, *.accdb);DBQ=%s

note that there is only one percent sign in the value of PGEO_DRIVER_TEMPLATE variable.

I can not load a Esri personal Geodatabase file into Qgis 3 anymore.

I has already added the following lines to qgis.bat:

set OGR_SKIP=ODBC

set PGEO_DRIVER_TEMPLATE=DRIVER=Microsoft Access Driver (.mdb, *.accdb);DBQ=%%s*

I also have QGIS 2.18.17 (LTR) installed on same machine and It still working there.

I installed both from OSGeo

I am trying to load a ESRI personal Geodatabase in QGIS 3.03 (Windows 10) and it's not working. The personal geodatabase file can be downloaded from this link: <https://pubs.usgs.gov/of/1997/ofr-97-470/OF97-470K/graphic/data.html>
