Hi Agus,

well, now we know that Ctrl++ and Ctrl+- do not zoom at all and it is on purpose (#1824), I guess this ticket does not make sense anymore. Please reopen if I am wrong.

#2 - 2009-08-09 02:50 AM - alobo -

- Resolution deleted (invalid)
- Status changed from Closed to Feedback

No matter which keyboard shortcut would be linked to zooming, re-centering to current cursor position is often required. I suggest having one shortcut for zooming with re-centering and another one for zooming as currently done.

1824 refers to the shortcut, 1825 refers to the actual tool.

Agus

#3 - 2011-10-12 02:02 AM - alobo -

- Pull Request or Patch supplied set to No
- Target version changed from Version 1.7.0 to Version 1.7.1
- Assignee deleted (nobody -)
- Status changed from Feedback to Closed

Re-centering after zooming in works fine on 1.7.1 ubuntu binaries from ubuntugis-unstable

Please re-open if this is not the case for other OS.

Agus
