

QGIS Application - Bug report #18253

[Layout][Atlas]Disable the atlas tools when no coverage layer is provided or give more hints on the error message

2018-02-27 06:51 PM - Harrissou Santanna

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.1 (master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26144
Description		
<p>Enable "atlas generation" in a new print composer and without selecting a coverage layer launch the export to image (or anything else).</p> <p>The process of folder selection goes normal and at the end you get an error message: Error encountered while exporting PDF. Nothing more.</p> <p>Given that none of the atlas tools is usable as long as no coverage layer is selected, either we disable those tools or the error message points the user to where the issue resides.</p>
