

QGIS Application - Bug report #18287

QGIS crashes when deleting multiple items in layout

2018-03-01 02:23 PM - Harrissou Santanna

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 26178
Description		
User Feedback		
I have a project from 2.x that i am now using under 3.1 In one of the preexisting A3 layout, I added a new A0 page and placed items on it Then because I only want to export the A0 page, I duplicate that layout. In the newly created layout, using click and drag I selected all the items of the first page (A3) and press DEL Then KABOOM!!!
