QGIS Application - Bug report #18303 Raster Calculator "Output Layer" opens, rather than saves

2018-03-01 09:04 PM - David Caplin

Status: Closed Priority: Normal

Assignee:

Category: Raster Calculator

Affected QGIS version:3.1(master)

Operating System: Windows 10

Regression?: Yes

No

Pull Request or Patch supplied: Resolution: fixed/implemented

Crashes QGIS or corruptes data: Copied to github as #: 26194

Description

I'm using the current Nightly build of QGIS 3.1.0 (a483ef817a).

When using the Raster Calculator I've run into an issue.

When trying to set the output layer, it opens the "open file" dialog box, rather than the "save file" box.

(Video of issue in action: https://youtu.be/L4fYpHf4kBc)

Using Windows 10.

Same issue whether there is an expression used or not.

If you type the path and name in yourself, it works, but doesn't allow you to use the file browser to save it.
