History

#1 - 2018-03-02 11:14 AM - Jonathan Robinson

Just tried to edit the shp layer again but this time QGIS crashed while I was deleting a field.

I cannot confirm it here. Can you add detailed steps here (i.e. where are you doing the structure edits, in vector properties or from the table of attributes?), thanks.

#3 - 2018-03-06 11:49 AM - Nelson José Silva

No problems where with Win7

#4 - 2018-11-08 01:31 PM - Giovanni Manghi

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

#5 - 2018-12-28 12:14 PM - Paolo Cavallini

Could you please check again on current release?
Thanks.
