QGIS Application - Bug report #18308
Invalid WFS-Transaction Update request

2018-03-02 11:27 AM - Martin Kofahl

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Web Services clients/WFS			
Affected QGIS version:	3.0.0	**Regression?:**	No	
Operating System:	Windows x86_64	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	26199	

Description

An WFS-T update request generated with QGIS 3.0.0 uses the xml attribute name "typeNames" in the "Update" tag. According to the specification, "typeName" should be used for updates.

History

#1 - 2018-03-03 06:34 PM - Giovanni Manghi

- Status changed from Open to Feedback

Does 2.18 behave the same way?

#2 - 2018-03-04 12:31 PM - Martin Kofahl

- Status changed from Feedback to Open

No, 2.18 correctly uses "typeName" as xml attribute name. However, 2.18 fails because auf #17945 (also relevant for 3.0).

#3 - 2018-05-31 12:16 PM - Even Rouault

- Resolution set to fixed/implemented

I believe this should be fixed now in master since https://github.com/qgis/QGIS/commit/7511d1ffdb867f3bd19bf0697afa5c49ae6b621d

#4 - 2018-09-21 11:00 PM - Even Rouault

- Status changed from Open to Closed
