Description

Step to reproduce:

1. toggle editing mode

2. click node tool

3. right click on canvas

4. click popped up "Vertex Editor"

5. "Vertex Editor" appears and is selected in View / Panel

6. close "Vertex Editor" panel

7. "Vertex Editor" now disappears from View / Panel

Anyway this current behaviour, though still nagging somewhat, is definitely **way*** improved from 2.18 in which that the panel just keeps pops up all the time.

Shouldn't "Vertex Editor" panel simply be blank/grey out when node tool is toggle off or not currently in use.
