QGIS Application - Bug report #18352
DB Manager is not showing the result after a SQL query

2018-03-06 01:26 PM - Etienne Trimaille

Status:	Closed			
Priority:	High			
Assignee:	Paul Blottiere			
Category:	DB Manager			
Affected QGIS version:	3.1(master)	**Regression?:**	Yes	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26242	

Description

On QGIS Master 3.1, after I run a simple query such as `select * from my_table`, the result panel stays empty.

The query works well in QGIS 3.0 and in PgAdmin. But in 3.1, I can guess that the query is running because the panel is disabled while the query is running in the background. But then, the window is reactivated again but the result is not displayed.

It might be related to the display with MacOS?

I don't think it is related to MacOS, since I'm seeing the same problem with QGIS 3.1.0-Master (5b8599e9bb) on Windows.

It works when I run a query via Virtual Layers, but not with PostGIS directly, in which case I see a "Task Complete" notification, but no results.

The following Python error is logged:

```
WARNING
Traceback (most recent call last):
  File "C:/PROGRA~1/QGIS2~1.18/apps/qgis-dev/./python/plugins\db_manager\dlg_sql_window.py", line 233, in executeSqlCompleted
  if self.modelAsync.task.status() == QgsTask.Complete:
AttributeError: 'NoneType' object has no attribute 'status'
```
