QGIS Application - Bug report #18356
DB Manager: import layer into Postgis fails with "Error 5 Creation of fields failed."

2018-03-06 05:18 PM - Rui Pedro Henriques

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	DB Manager		
Affected QGIS version:	3.4.4	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	26246

Description

When trying to import a layer to Postgis I get "Error 5 Creation of fields failed."
The table and fields id and geom are created on the DB.

It was tested on QGIS 2.18.15/win 10 and QGIS 2.18.0 on MacOS.

History

#1 - 2018-03-06 05:28 PM - Giovanni Manghi

- Operating System deleted (QGIS 2.18.15/win 10 and QGIS 2.18.0 on MacOS)

- Subject changed from DB Manager - import layer into Postgis to DB Manager: import layer into Postgis fails with "Error 5 Creation of fields failed."

- Affected QGIS version changed from 2.18.15 to 2.18.16

Confirmed also on Linux. (Ricardo?) can you test also QGIS 3? Thanks.

#2 - 2019-01-21 12:34 AM - Jürgen Fischer

- Status changed from Open to Feedback

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#3 - 2019-02-23 01:06 PM - matteo ghetta

Confirmed also on 3.4 but only with the attached data and not with other data. So I suspect something is weird on data side.

#4 - 2019-02-23 01:28 PM - Giovanni Manghi

- Status changed from Feedback to Open

- Affected QGIS version changed from 2.18.16 to 3.4.4

please bump affected version if necessary.

#5 - 2019-02-23 03:26 PM - Federico Gianoli

- File bug.JPG added

The error, with this dataset, persist on QGIS 3.4.4

Error 4
Creation of fields failed
