Pull Request or Patch supplied:			**Resolution:**	wontfix
Easy fix?:	No		**Copied to github as #:**	11899

Description

Sometimes i need to produced more than one map from the same file. What i end up doing is resaving the project a multiple times.

I think it'll be great if map composer could be tabulated, where each tab represents a different map

- Resolution set to wontfix

- Status changed from Open to Closed

In the new print composer (latest qgis versions), you can save print composer templates. This pretty much solve your problem.
