QGIS Application - Bug report #18398
QGIS3 Print settings error

2018-03-09 05:33 PM - Noel Ballantyne

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	3.0.0	**Regression?:**	Yes	
Operating System:	win 10	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26288	

Description

I'm new here. I have searched but haven't found this error over the past few days.

I updated from 2.18 to 3. Opened an existing project, everything great, faster rendering (yay).

When printing directly to the A4 printer, the paper size is not recognised by the printer and when the layout does print, part of the layout is missing. I have tried to print to A0 printer and the paper size keeps changing to A4 from A0 or A1

When I print to pdf, everything is fine.

Yes all layouts printed ok on 2.18

#3 - 2018-03-12 12:19 PM - Alessandro Pasotti

can you attach your test project (and minimal data)?

#4 - 2018-03-12 01:20 PM - Noel Ballantyne

690 layers in file.

Ill trim in down to 3/4,

Will i do same for 2.18 version?

- File Japanese_Knotweed.sbn added
- File Japanese_Knotweed.prj added

3 layouts A4 sized.

#6 - 2018-03-13 12:07 PM - Alessandro Pasotti

Thanks, no need to attach a 2.x project: the layout code is a complete rewrite.

#7 - 2018-05-09 12:30 PM - Fernando Ciges

The same happens to me. I have gone from version 2.18 to version 3.0. In the Las Palmas version I had no problem with printing.
I usually work in A3 format and as I said in version 2.18 I did not have any problems with printing from the "designer manager", but in version 3.0, from the "Show Layout" I printed the rotated drawing occupying only a part of A3 paper. Paper comes out horizontally and printing makes it vertical. It is not a problem to configure the printer or the preferences because with version 2.18 I do exactly the same and print well.
