

QGIS Application - Bug report #18401

After doing zoom, it does not show any layer

2018-03-09 08:29 PM - Mario FF

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Canvas	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:	Microsoft Windows 10 Home / 10.0.16299	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26291
Description		
<p>Project with raster ASC, WMS and SHP layers. Sometimes, once you zoom, when trying to refresh map, it doesn't show anything. pProgresion bar of statusbar keeps "running" but nothing is showed.</p> <p>Once it is broken, if you load any other project, it does not represent any map info</p>

Can you please attach a sample project with minimal data to reproduce the issue?

"Sometimes" is not of much use for someone who try to reproduce the issue, can you please list all steps that are necessary to trigger the problem?

#2 - 2018-03-12 09:57 PM - Mario FF

- File qgisTEST.zip added

Ziped QGIS Project attached

"Sometimes" is not of much use for someone who try to reproduce the issue, can you please list all steps that are necessary to trigger the problem?

If you zoom in sometimes (5, 6 times), then you zoom up, and map canvas keep blank
