to help us to reproduce the issue, it would be useful if you could describe precisely how did you install QGIS, how and which repository you added, exact output of apt-cache policy qgis etc.

Can you reproduce it on a clean ubuntu 16.04 xenial VM?

I installed with apt install qgis

then purged and removed all qgis* packages listed by dpkg

then reinstalled with aptitude install -f qgis

repositories:

```
deb http://qgis.org/ubuntuGIS xenial main
```

```
deb-src http://qgis.org/ubuntuGIS xenial main
```

```
deb http://ppa.launchpad.net/ubuntuGIS/ubuntuGIS-unstable/ubuntu xenial main
```

```
deb-src http://ppa.launchpad.net/ubuntuGIS/ubuntuGIS-unstable/ubuntu xenial main
```

apt-cache policy:

qgis:

crssync isn't verbose anymore - and silent if there's no problem. Do you see any output from qgis-providers-common's postinst?
