QGIS Application - Bug report #18439
Advanced setting editing are reset after closing of Options GUI

2018-03-14 12:57 PM - Luigi Pirelli

Status:	Open			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	3.0.0		**Regression?:**	Yes
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	
Crashes QGIS or corrupts data:			**Copied to github as #:**	26327

Description

Any advanced setting is correctly set in the ini file during editing, but any change is lost just after the Options GUI is closed with OK button

mSettings in QgsOptions seems not be the same instance of settings of the QgsSettingsTree

History

#1 - 2018-03-14 12:58 PM - Luigi Pirelli

- Assignee deleted (Etienne Tourigny)

#2 - 2018-03-14 01:08 PM - Luigi Pirelli

- Regression? changed from No to Yes

the error affects Master also and is not present in 2.18 => regression

#3 - 2018-03-14 01:21 PM - Luigi Pirelli

UX workaround is, after edited advanced options, to close options gui without passing from the OK button => e.g. press Esc
