

QGIS Application - Bug report #18455

Enforced constraints not working in attribute table

2018-03-15 11:03 PM - Harrissou Santanna

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Attribute table	
<b>Affected QGIS version:</b>	3.1(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 26343
<b>Description</b>		
<p>In the layer properties --&gt; attribute form tab, select a field and add constraints + check the enforce constraint option: In my case, i checked the options for "not null" and "unique".</p> <p>When creating a feature, the constraints options work well in the form, disabling the ok button when value does not comply with constraint.</p> <p>However, when editing existing field in the attribute table, i can add null value or add an existing value (hence, not unique) and i can save the changes.--&gt; the field does not respect the constraints.</p>
