QGIS Application - Bug report #18489
join attributes by location

2018-03-20 03:21 PM - Thibault JACQUIN

Status:	Closed			
Priority:	High			
Assignee:	Victor Olaya			
Category:	Processing/Modeller			
Affected QGIS version:	3.0.0	**Regression?:**	No	
Operating System:	windows 7 professional	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26377	

Description

I'm on QGIS 3.0.0
I created a modeller with the "Join attributes by location" function. In parameter, i want to joint the attributes that are inside so i check the good parameter. But when i close and open again the function, the intersect parameter has always checked.
