There's not enough details here - how did you trigger this crash?

#2 - 2018-03-21 10:39 AM - Neil Breton

Hi Nyal

I'm not sure I'm afraid. I had an instance of QGIS open, put my laptop into standby, then when I went back into the laptop and went back to the QGIS window, there was just the error message above. Sorry I can't be more specific.
