

QGIS Application - Feature request #1851

symbology multiple selection should highlight all regardless of different properties

2009-07-31 07:52 AM - dassouki -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: worksforme
Easy fix?: No	Copied to github as #: 11911
Description	
<p>sometimes, a line layer can have 40 different classifications; however, i'd like to have the first 20 to have a similar style (black line with pink brunsh for instance). When i multiple select the items in symbology, i can't change the color field. Thus, i have to change each classification's color on its own.</p> <p>Is it possible to add a feature that allows for multiple highlighting and change the color / line type of all the highlighted features, regardless of the colors in them.</p>

Replying to [dassouki](#):

sometimes, a line layer can have 40 different classifications; however, i'd like to have the first 20 to have a similar style (black line with pink brunsh for instance). When i multiple select the items in symbology, i can't change the color field. Thus, i have to change each classification's color on its own.

Is it possible to add a feature that allows for multiple highlighting and change the color / line type of all the highlighted features, regardless of the colors in them.

You can only change properties that are common for all selected classes.

Initially all properties except for the color are the same. That's why there is a possibility to reset the color of all (selected) classes to white. That also opens the opportunity to change colors for multiple classes at once.
