

## QGIS Application - Bug report #18518

### QGIS Server 3 GetFeatureInfo doesn't resolve value relations anymore

2018-03-23 07:01 AM - Tudor Bărăscu

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Alessandro Pasotti	
<b>Category:</b>	QGIS Server	
<b>Affected QGIS version:</b>	3.1(master)	<b>Regression?:</b> Yes
<b>Operating System:</b>	Debian Buster	<b>Easy fix?:</b> No
<b>Pull Request or Patch applied:</b>	Yes	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 26406
<b>Description</b>		
QGIS Server should should return the "solved" values when doing GetFeatureInfo on value relation and not the id's/keys.

[bugfix][server] Respect relations in getfeatureinfo

Fixes #18518

QGIS Server 3 GetFeatureInfo doesn't resolve value relations anymore

#### History

#1 - 2018-03-23 08:00 AM - Kim Frankcombe

Tudor, I thought the same thing but found it off the side of my screen. Are you sure you are not seeing the same issue with the Identify Results window opening with the Features column maximised and the Value off screen, right? Try dragging the Results window left and see if the values appear.

I'mo doing the request manually from terminal, so there's no client issue here. On a QGIS 2.18 server it works as it should.

I actually don't understand what are you suggesting to do.

E.g. For an integer column, let's say we have the column value 3 that when mapped to a table using value relation has the value "Functional". In GetFeatureInfo I get 3 instead of "Functional" --> I get the key and not the value.

I am not saying that I don't get any Return Value in order to search it in the side of the screen like you're suggesting, I'm saying that I don't get the expected output.

Thanks for the info!
