QGIS Application - Bug report #18525
represent_value fails in QGIS atlas printing mode

2018-03-23 03:15 PM - Andreas Neumann

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	3.1(master)	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26413	

Description

This concerns atlas printing (layout).

When using the expression represent_value(fieldname) in the context of a relation reference widget, the preview in the expression builder works fine - but on the layout the internal code is displayed instead of the display value text.

See screenshot attached.

Needs to be backported to QGIS 3.0x as well.

Thanks for having a look at this. Thanks!
