

## QGIS Application - Bug report #18589

### Behavior of Ctrl+T with map annotation tools is hard to understand

2018-03-30 02:22 PM - Harrissou Santanna

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Canvas	
<b>Affected QGIS version:</b>	3.1(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 26477
<b>Description</b>		
QGIS documentation says:		
<div><i>If you press `Ctrl+T` while an `Annotation` tool is active (move annotation, text annotation, form annotation), the visibility states of the items are inverted.</i></div>		
I don't pretty understand what it means but this is another issue...		
I neither understand how this tool works in the map canvas: what decides which annotations are hidden or not?		
I added many annotations to the dialog and I'm unable to understand why visibility of half of them is toggled on/off when i press Ctrl+T and I cannot see how I can edit the list of impacted annotations (set some of them to stay always visible, or make anothers "togglable").
