QGIS Application - Feature request #18603
QGIS3: inform, which geometries have been fixed

2018-03-31 09:24 PM - Tobias Wendorff

Status:	Open		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/Core		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	26491

Description

ArcGIS (and others) give detailed information, which geometries have been fixed when using the fill holes / fix geometry tools.
Since QGIS doesn't, this important information is lost. It would be nice to add this information to a field or create a point feature (like ArcGIS does)

History

#1 - 2018-04-04 09:12 PM - Tobias Wendorff

Workaround: Use "check validity" first, but this didn't help with identifying holes, slivers etc. which got fixed.
