

QGIS Application - Bug report #18604

Projects load extremely slowly [2.18.18]

2018-03-31 10:45 PM - Patrick Dunford

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	2.18.17	Regression?: No
Operating System:	Debian 9.3	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 26492
Description		
Under 2.18.18 some projects are extremely slow loading, that was not the case under 2.18.17.		
Will send a sample project within the day.		

History

#1 - 2018-04-01 09:28 AM - Patrick Dunford

So far it looks like the issue might be related to the availability of network resources. However a project which had the issue of network unavailability (SMB) also failed to load a number of local layers for unknown reason.

It would seem for the network the speed at which a networked resource is evaluated for being available or not, could be much slower than for a local resource.

I need to do some more testing to try to nail down exactly what is happening since it is far from clear ATM.

#2 - 2019-01-21 12:35 AM - Jürgen Fischer

- Status changed from Open to Feedback

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#3 - 2019-02-23 12:09 PM - matteo ghetta

- Status changed from Feedback to Closed

#4 - 2019-02-23 01:30 PM - Giovanni Manghi

- Resolution set to worksforme

Please set the resolution when closing tickets.
