

QGIS Application - Bug report #18610

attribute table ... staggered data and incomplete records ...

2018-04-02 08:31 PM - R. James Weick

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Affected QGIS version:	2.18.16	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch applied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 26498
Description		
<p>I'm using large dataset (35000+ items) downloaded as shp files with dbf table data ... I'm subdividing the data using polygon select into two subsets ... the resulting subdivided data has two sets of headings and some of the data is staggered so that a portion of it appears under the duplicated headings and some of the data is not complete ... I can't tell if there is a bug or if I am doing something wrong ...//rjw</p>
