

QGIS Application - Bug report #18639

Layout image: svg parameter data-defined button does not apply to selected item

2018-04-05 07:27 AM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 3.1(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 26527
Description	
<p>I think this is related to #18367 but...</p> <p>In print layout, make visible both Items and Items properties panels Add a map item, select an svg file from qgis defaults Give it some different DD fill color (also applies to other parameterized DD properties) Copy paste the item The new item is selected as shown in Items panel and "canvas". Add a DD stroke width You'll see that it's the first item that got changed and not the selected one.</p> <p>Weirder, deselect the item and select the first one, its DD stroke width is set as inactive but it got the stroke width value you enter (and its spinbox does neither show that value)</p>
