

QGIS Application - Bug report #18644

Layout node based polyline: svg markers do not scale well

2018-04-05 11:07 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 3.1(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 26532
Description	
In print layout, add a polyline node item In its item properties, select an SVG marker. It's barely visible... Whatever arrow head size you set, the marker is still invisible...

- Resolution set to invalid
- Status changed from Open to Closed

Actually, i was inverting arrow stroke vs head width (i thought the first option was the head size). Filling the head with a width value bigger than the stroke's fixes the issue.

Sorry for the noise...
