

QGIS Application - Bug report #18656

Print Layout: unable to manually modify the X and Y coordinates in the map Item properties panel

2018-04-06 05:56 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:	Map Composer/Printing	
Affected QGIS version:	3.1(master)	Regression?: Yes
Operating System:	Ubuntu 16.04	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26544
Description		
In print layout, add a map item		
Enable its properties panel and modify a value in the Extent group		
Nothing happens		
Press the Update preview button (who knows?): the values are reset.

Works fine here - can you confirm the steps required to reproduce this?

No more steps than what is described above.

Investigating a bit, i find that it has to do with conversion of decimal separator. Values are displayed with a dot but i can't enter dot in my text lineedit. And if i use comma, i need to use it in all the four boxes to have the map item resized; changing a single value is ignored.

In 2.18, values are displayed with dot and changes allow both dot and comma (with no need to update the four boxes)

Ah, in that case I'm clueless - I have no idea about localisation and comma/decimal handling, and an impromptu qa held at the hackfest last year left me more clueless! Someone else will need to fix this.

#4 - 2018-04-09 04:41 PM - Harrissou Santanna

Did something change in that area in the underlying libraries? Because it works pretty well in 2.18: i can type x and y coordinates values with either "." or  
" " or  
, ' .

I'm able to reproduce it on windows with italian locale, I'll have a look.
