QGIS Application - Bug report #18684
inserting fields in expression generator uses double quotes instead of simple quotes

2018-04-10 01:40 PM - Denis Rouzaud

Status:	Closed			
Priority:	Normal			
Assignee:	Nyall Dawson			
Category:	Expressions			
Affected QGIS version:	3.1(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26572

Description

In layout composer, in atlas, when adding a field for an expression as `attribute( @atlasfeature, 'myfield' )` myfield is added with double quotes instead of double quotes

History

#1 - 2018-04-10 01:46 PM - Nyall Dawson

That's because it's adding the "object_id" attribute for the atlas feature, not the string literal 'object_id'. I.e. get the value for the current fearure of object_id (say, "5"), and then get the attribute from that feature with matching field name (field with name "5").

It's the same behaviour everywhere with expressions.

- Resolution set to invalid

- Status changed from Open to Closed

right, of course.

sorry for the noise
