

QGIS Application - Bug report #18714

QGIS crashes when opening a project having joined layers with spaces in names

2018-04-12 01:12 AM - Nikolay Lebedev

Status:	Open	
Priority:	Normal	
Assignee:	Matthias Kuhn	
Category:	Relations	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 26601
Description		
<p>Steps to reproduce:</p> <p>Add two layers to the project.</p> <p>Add a space in layer name for one layer (i.e. "my layer").</p> <p>Join this layer to another one, so that join has a space in it's name.</p> <p>Save and close the project, open again - boom.</p> <p>Should be an easy fix with using layer id's etc. instead of names with spaces.</p>
