

QGIS Application - Bug report #18733

Legend not matching map with "lock style for layers" option

2018-04-17 01:26 AM - Antoine Lafranchis

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26620
Description Steps to reproduce 1: Create a project with some polygons and a make a new layout. 2: In the layout editor, add a map and a legend. 3: Activate the "Lock layers" and "Lock style for layers" options on the map. Disable auto-update on the legend. 4: Close the layout editor. 5: Change the colors of some objects. 6: Save the project and exit QGIS. 7: Reopen QGIS, load the project and open its layout. 8: The map kept the styles locked but the legend updated with the new styles. I use QGIS 3.0.1 and the issue was there in version 2.18. Related question: Is it possible to copy the styles from a layout and paste them to an object on the map? If not should I would like to ask it as a feature request.
