

QGIS Application - Bug report #18756

crash opening a map with UTF-8 character type

2018-04-18 06:26 PM - Alden Nascimento

Status: Rejected	
Priority: Normal	
Assignee:	
Category: Attribute table	
Affected QGIS version: 3.0.1	Regression?: No
Operating System: Windows 7	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: Yes	Copied to github as #: 26643

Description

Using a layer I noticed that the characters in the attribute table display incorrectly, so I set the character type for UTF-8, which corrected the display problem.

After closing the application and opening the same project again resulted in the following error, which caused the crash in the application:

Um erro ocorreu enquanto executava o código Python:

AttributeError: 'QUrl' object has no attribute 'setEncodedUrl'

Traceback (most recent call last):

```
File "C:/Users/administrator/AppData/Roaming/QGIS/QGIS3/profiles/default/python/plugins/qgiscloud/qgiscloudplugindialog.py", line 670, in update_local_layers
```

```

- *Resolution set to invalid*
- *Status changed from Open to Rejected*

This bug is in the qgis cloud plugin and needs to be filed with that plugin's author.
