

QGIS Application - Bug report #18758

QGIS3: mysteric QByteArray display in dvanced Settings Editor

2018-04-18 08:57 PM - Tobias Wendorff

Status: Open	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: 3.0.1	Regression?: No
Operating System: Microsoft Windows 7, 64-bit	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 26645
Description	
<p>Experienced on QGIS3, GIT build 6e3d879544, OSGeo4W 64-bit.</p> <p>settings > options > advanced (Advanced Settings Editor) shows mysteric values in QByteArray (see image in attachment). Maybe this is correct, since it's binary? But since the field it editable, it should be something read- or copy-able... like HEX values?!</p>
