<b>Description</b>		
<p>Use case: let's say you have a multipage A4 layout (for an atlas eg) and realize at some point that you should instead use another size (A3 or a custom size) to better show the information. Currently, you'd need to right-click and change properties of pages one by one.</p> <p>Like the Guides panel has a button to apply guides to other pages, it could be nice to be able to harmonize page size using an existing page properties.</p> <p>Or maybe an option to apply a page properties to another one?</p>
