Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11939
Description		
Hi, A fresh checkout of svn trunk fails to build on Debian due to a missing build-depends on the pyqt4-dev-tools package. <pre>\$ debuild binary ... -- Looking for openpty - found -- Found [[PythonLibs]]: /usr/lib/python2.5/config/libpython2.5.so -- Found [[PythonInterp]]: /usr/bin/python2.5 ERRORpyuic4 is required -- Python libraries found -- Python bindings enabled -- Looking for Q_WS_X11 -- Looking for Q_WS_X11 - found ... [96%] Generating ui_qgsplugininstallerbase.py /bin/sh: PYUIC4_PROGRAM-NOTFOUND: command not found maker3: *** [python/plugins/plugin_installer/ui_qgsplugininstallerbase.py] Error 127 ...</pre> the attached patch vs. svn trunk adds that & then it builds ok. thanks, Hamish
