

QGIS Application - Bug report #1884

addFeatures don't work for SpatialLite layer

2009-08-19 06:17 AM - Alexander Bruy

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11944
Description		
<p>Seems that addFeatures method of [[SpatialLite]] data provider don't work. I try to copy all features from shapefile to empty [[SpatialLite]] layer with help of simple plugin and have no result. Fetures don't adds.</p> <p>I run same plugin but with both shapefiles and all work fine.</p> <p>Tested on Windows XP Pro SP3 with QGIS 1.2.0 (qgis-dev package, versions up to 1.2.0-25) and QGIS 1.1 obtained from OSGEO4W installer .</p> <p>Sample plugin with all necessary data attached. In archive there is shapefile, empty [[SpatialLite]] database and simple plugin which copied fetures from shapefile to database</p>		

History

#1 - 2009-08-19 08:07 AM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:52c420b0 (SVN r11439)

Although that doesn't fix problems in your data model/plugin. You have several columns with NOT NULL constraints on them and don't assign any values. You also have a primary key column, that you don't initialize.

If you have an own primary key, you need to initialize it.
