

QGIS Application - Bug report #18866

1:n relation: "On map identification" relation widget does not update the value

2018-04-27 04:41 PM - matteo ghetta

Status:	Closed	
Priority:	Normal	
Assignee:	Matthias Kuhn	
Category:	Relations	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:	linux	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26699
Description		
With 2 geometric layers, with the "On map identification" option of Reference Widget enabled, when clicked on a new feature of the "parent" layer the value is not written (empty cell). A gif in attach to show the problem

- File Bildschirmfoto vom 2019-03-18 23-49-33.png added

still not working in 3.6. Trying to reference a point to a non-spatial child layer. The feature is indeed identified (can see all values when showing embedded form) but the reference value is not handed over/field is not populated. Would be an awesome feature for quickly creating 1:n entries if it would work.

#2 - 2019-03-20 01:31 PM - Giovanni Manghi

- Affected QGIS version changed from 3.1(master) to 3.6.0

#3 - 2019-05-23 11:37 AM - matteo ghetta

- Status changed from Open to Closed

From some tests I think this issue has been fixed in #22071.
