Description		
Hi		
Using QGIS 3.0.1 and MetaSearch 0.3.5. In the MetaSearch 'search' dialog, I get an error when selecting "New Zealand: LINZ Data Service" and pressing the 'search' button. The error is "Search error: 'Exception: document not well-formed.\nError: None.'"		
Other catalogs seem to be working okay.

Looks like an issue with the CSW endpoint (see related issue at <https://github.com/ZGIS/smart-csw-ingester/issues/39>)

Update on this issue? Looks like the LINZ CSW is up again.
