

QGIS Application - Bug report #18926

gdal_contour -snodata value kills the command

2018-05-08 01:06 PM - matteo ghetta

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Processing/GDAL	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:	any	Easy fix?: No
Pull Request or Patch applied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26758
Description		
Using gdal contour with -snodata flag (any number added) causes the self-kill of the command by gdal itself. Seems a more generic GDAL issue, see https://github.com/OSGeo/gdal/issues/594 , but anyway the flag should be removed
