

QGIS Application - Bug report #18929

Service url cannot include custom query parameters

2018-05-09 02:12 PM - Lorenzo Pini

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WCS	
Affected QGIS version:	3.0.1	Regression?: No
Operating System:		Easy fix?: Yes
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26761
Description		
Adding new services (WCS, WMS, WFS) the url cannot contain any custom parameter. If a custom parameter is added, QGIS will use invalid URLs to access the resources. For example with access_token or mapId query parameters. http://localhost/server/?access_key=123456789 will result in http://localhost/server/?access_key=123456789?&#38;SERVICE=WCSx%x%.... QGIS should always generate a valid url to load the layers

Errata, WMS and WFS are working, the issue is only with WCS.

Tested with 3.0.2 too.
