

QGIS Application - Bug report #18930

Crash when creating virtual field

2018-05-09 06:48 PM - Antoine Lafranchis

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Field calculator	
Affected QGIS version:	3.0.2	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 26762

Description

User Feedback

I created a virtual field with the expression: x(closest_point(\$geometry, centroid(\$geometry)))

QGIS Info

QGIS Version: 3.0.2-Girona
QGIS code revision: commit:307d082e3d
Compiled against Qt: 5.9.2
Running against Qt: 5.9.2
Compiled against GDAL: 2.2.4
Running against GDAL: 2.2.4

System Info

CPU Type: x86_64
Kernel Type: winnt
Kernel Version: 10.0.15063

History

#1 - 2018-06-01 04:59 PM - Even Rouault

- Status changed from Open to Feedback

Works for me. Could you share the dataset you used ?

#2 - 2018-06-01 11:20 PM - Antoine Lafranchis

It works fine now. It's either fixed or non-reproducible.

#3 - 2018-06-01 11:41 PM - Nyal Dawson

Did you try with the attribute table open? From the trace it appears the table was visible.

#4 - 2018-06-02 12:50 AM - Antoine Lafranchis

Yes I tried with the attribute table open and with all the different data types available.
However, QGIS did crash when I removed the virtual field, as in this issue #18812

#5 - 2018-11-08 01:31 PM - Giovanni Manghi

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

#6 - 2019-02-23 08:36 PM - Jürgen Fischer
