

QGIS Application - Bug report #18937

Qgis 3 can't properly load gml files.

2018-05-11 09:10 PM - Jorge Almaraz

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	3.0.2	Regression?: No
Operating System:	windows and linux	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26769
Description		
Some gml files can't be properly loaded by the last version of qgis. The previous version of Qgis(2.18) load them correctly. To reproduce this bug you can try to load any gml file from the spanish cadastre web: http://www.catastro.minhap.es/INSPIRE/CadastralParcels/10/ES.SDGC.CP.atom_10.xml

Works fine for me.

Could you check your gdal/ogr version?
