Affected QGIS version:	3.1(master)	**Regression?:**	No
Operating System:	Linux	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26773

Description

At work, using QGIS 3.0.1 on Windows, I can edit a GeoPackage created by QGIS by running SQL in DBManager, great!

However, at home using QGIS 3 master on Linux I can't.

I get Python error:

2018-05-12T06:44:10   WARNING   Traceback (most recent call last):
    File "/usr/share/qgis/python/plugins/db_manager/db_manager.py", line 195, in runSqlWindow
    query = DlgSqlWindow(self.iface, db, self)
    File "/usr/share/qgis/python/plugins/db_manager/dlg_sql_window.py", line 99, in *init*
    self.btnCancel.setShortcut(QKeySequence.Cancel)
    AttributeError: type object 'QKeySequence' has no attribute 'Cancel'

The GeoPackage was created in the Linux QGIS app, but when clicking on the SQL Window icon, I get the error above.

Similar problem here, with QGIS 3.2 and Ubuntu 16.04 (xenial). When clicking on SQL Window icon, I get same error message :

File "/usr/share/qgis/python/plugins/db_manager/db_manager.py", line 195, in runSqlWindow
query = DlgSqlWindow(self.iface, db, self)
File "/usr/share/qgis/python/plugins/db_manager/dlg_sql_window.py", line 99, in *init*
self.btnCancel.setShortcut(QKeySequence.Cancel)
AttributeError: type object 'QKeySequence' has no attribute 'Cancel'

#2 - 2018-07-05 09:15 PM - Daniel Victoria

I'm also having this issue. QGis v3.2.0-Bonn on Ubuntu 16.04 (xenial).

Loaded a shapefile in QGis and opened DB Manager. I can see the layer info, table and preview. But when I click on SQL Window, I get the same error reported by julie:

2018-07-05T16:13:20   WARNING   Traceback (most recent call last):
    File "/usr/share/qgis/python/plugins/db_manager/db_manager.py", line 195, in runSqlWindow

query = DlgSqlWindow(self.iface, db, self)

File "/usr/share/qgis/python/plugins/db_manager/dlg_sql_window.py", line 99, in __init__

self.btnCancel.setShortcut(QKeySequence.Cancel)

AttributeError: type object 'QKeySequence' has no attribute 'Cancel'

#3 - 2018-07-05 11:00 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Already fixed in master /3.2.1
