QGIS Application - Bug report #18967
Crash when adding map (under layout) unto Print Composer window

2018-05-17 01:55 AM - Alejandra Arce

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	3.0.2	**Regression?:**	No
Operating System:	Windows 7	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26798

Description

I go to Project -> New Print Composer. I leave the composer name empty. Then I go to Layout -> Add Map. I hold the left mouse button down and drag a red rectangle in the area of the composer canvas where I want to insert my map. "Renderization" appears in the rectangle area, then a window pops up with the message "QGIS crashed". In the attached jpeg file you can see the exact crash reported. I just installed the latest QGIS version, after this happened the first two times, I disinstalled and reinstalled it. It keeps happening. Your help is greatly appreciated it.
