

QGIS Application - Bug report #18977

Problem changing the projection of point shapefile

2018-05-17 11:10 PM - José Miguel Pascual

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Projection Support	
<b>Affected QGIS version:</b>	3.0.2	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 26808
<b>Description</b>		
<p>I'm trying to change the projection of points in the US from WGS 84 to US Atlas (EPSG: 2163), to calculate distances.</p> <p>In order to do that, I opened the csv with the points and then save it writing a new vector in the required projection. The issue is that I loose most of the points (all in Nebraska for example) on the new shapefile.</p> <p>Here I add part of the csv data and the new shapefile.</p>

Setting crs for extent group box shouldn't auto check the box

Causes e.g. changing the destination CRS in the save vector file dialog to accidentally enable the "extent" filter option.

I'm trying to change the projection of points in the US from WGS 84 to US Atlas (EPSG: 2163), to calculate distances.

In order to do that, I opened the csv with the points and then save it writing a new vector in the required projection. The issue is that I loose most of the points (all in Nebraska for example) on the new shapefile.

When trying to reproject it using the processing toolbox it crashes.

User Feedback

Qgis crashes when trying to reproject it using the processing toolbox

Report Details

Crash ID: 7f7fe12663f1e633a0c13ed0e00e224678193a18

Stack Trace

RaiseException :  
\_TypeMatch :  
RtlCaptureContext :  
QThreadPoolPrivate::reset :  
QThread::start :  
BaseThreadInitThunk :

QGIS Info

QGIS Version: 3.0.3-Girona  
QGIS code revision: commit:8a899c8758  
Compiled against Qt: 5.9.2  
Running against Qt: 5.9.2  
Compiled against GDAL: 2.2.4  
Running against GDAL: 2.2.4

System Info

CPU Type: x86\_64  
Kernel Type: winnt  
Kernel Version: 10.0.16299

Here I add part of the csv data and the new shapefile.

#2 - 2018-05-22 03:30 AM - Nyal Dawson

<https://github.com/qgis/QGIS/pull/7043> fixes the described crash and missing features issue, but the underlying cause is a bad row in your CSV:

"Nb Washington Herman 41.673559 -96215069"

#3 - 2018-05-22 04:01 AM - Nyal Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed
