

QGIS Application - Bug report #19036

QGIS crashed after using plugin manager

2018-05-26 07:01 PM - Torsten Hase

Status:	Closed	
Priority:	High	
Assignee:	Borys Jurgiel	
Category:	Windows Package	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 26867

Description

Report:
h2. User Feedback

Report Details

Crash ID: 147561b020810973e7803b093f8191e3ff7090d3

QGIS Info

QGIS Version: 3.1.0-Master
QGIS code revision: commit:310bfb1e3e
Compiled against Qt: 5.9.2
Running against Qt: 5.9.2
Compiled against GDAL: 2.2.4
Running against GDAL: 2.2.4

System Info

CPU Type: x86_64
Kernel Type: winnt
Kernel Version: 10.0.16299

History

#1 - 2018-05-26 11:29 PM - Borys Jurgiel

Hi,

Is QGIS installed from the standalone installer or OSGeo4W? What other QGIS versions are already installed?
There were such issues reported if QGIS 2.x installed by OSGeo4W conflicts with the 3.0 package.

Please check if some of the cleanings described here works for you: #18261 and #18220.

Regards,
Borys

#2 - 2018-05-26 11:53 PM - Torsten Hase

It is installed from OSGeo4W and I have other versions installed.
I can load some plugins. It crashed sometimes. QGIS 3.1.0 use a lot of tim to start. There seems to be a bug to.
There should be an other way then to deinstall an reinstall ...

Thanks in advance

#3 - 2018-06-22 11:37 AM - Borys Jurgiel

- Category changed from Plugin Manager to Windows Package
- Status changed from Open to Closed

- Resolution set to duplicate

So I assume it duplicates #18261. Seems it's solved in recent packages, as there is no new reports since yours (and there was a few of them in previous months). If you still get the crash with the recent master (or with final 3.2 - to be released today and packages should be available within next 2-3 days), please let me know here and I'll (re)open a ticket for the OSGeo4W installer.
