

QGIS Application - Bug report #19042

Forms in Layer Properties - default values aren't remembered.

2018-05-28 01:31 PM - Jadwiga Trojak

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Forms	
Affected QGIS version:	3.0.3	Regression?: No
Operating System:	Windows 7 Professional	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26872
Description		
<p>I noticed that default values in Forms (Layer Properties) aren't remembered.</p> <p>I have a field (in gpkg layer) that I want to fill with the default value, applied on update, based on the expression (variable @user_account_name).</p> <p>After filling out the section 'Defaults' with an expression (Default value), and pressing 'OK' or 'Apply' button the change isn't remembered. Default value automatically changes to 'NULL'.</p>
