| Easy fix?: | No | Copied to github as #: 11968 |
| Description | | |
| When selecting a projection. | | |
| As seen here: | | |
| http://trac.osgeo.org/qgis/ticket/1875#comment:33 | | |
| a list of maintained datum association (3 and 7 parameters transformation) is available. | | |

History

#1 - 2009-09-01 12:29 AM - Magnus Homann

I'm not sure about this, better to use a single custom CRS.

#2 - 2009-09-01 12:43 AM - Giovanni Manghi

Ok, then maybe a selector like the GRASS one can be used to help the user define its own custom CRS. A detail indeed, but it would be nice to have it sometimes in the future.

#3 - 2011-03-08 11:32 AM - Giovanni Manghi

- Resolution set to wontfix
- Status changed from Open to Closed

A tool to handle raster/vector datum transformations involving NTV2 grids and towgs84 parameters is going to be developed as separate tool.
