

QGIS Application - Bug report #19087

QGIS 3.0.3, PostGIS 2.4.4/Postgres 10.3

2018-06-01 08:01 PM - al piszcz

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Affected QGIS version:	3.0.3	Regression?: No
Operating System:	Windows 10/64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26917
Description 1. Import vector layer and use QGIS Browser to connect and display vector data works fine. 2. Import GeoTIF raster data to table and the table is not display in QGIS Browser, the imported raster table is in the database when viewed with psql, sql, dbeaver. Is it possible to display and then load rasters from the QGIS Browser in QGIS 3.0.3? Thank you.

PostGIS Log Message

2018-06-01T22:54:17 WARNING Field rast ignored, because of unsupported type raster

I tried a suggestion to modify the datasource line in the .qgs project file and reloaded, same error

```
<datasource>PG: dbname='tdb' host=localhost port=5444 user='postgres' sslmode=disable key='rid' table="mtiscanraster"."test" column=rast
sql=</datasource>
```

tested column="rast" 'rast' rast
